

# Hello, I'm David Ross II

I'm a 26yr old aspiring full-stack web developer based in Orlando, FL. I'm passionate about building modern, user-focused applications from front to back. With a strong foundation in both design and development, I enjoy turning ideas into responsive, functional websites that solve real-world problems. Whether it's crafting intuitive user interfaces or architecting scalable backend solutions, I'm always learning and pushing my skills forward.

Let's build something great together!

## Projects

### Task Manager App

A full-stack to-do app using React, Express, and PostgreSQL. Includes user auth and real-time updates.

GitHub

Live Demo

### Weather Dashboard

Frontend app built with HTML, CSS, and JavaScript that displays weather data from a public API.
